OVERVIEW

The **AMD Ryzen 5 3400G Processor Gaming Desktop PC** is a powerful and well-balanced build designed for smooth gaming and multitasking performance. At its core, it features the AMD Ryzen 5 3400G processor, a 4-core, 8-thread CPU with a base clock of 3.7 GHz and a boost clock of up to 4.2 GHz, delivering exceptional speed for modern gaming and productivity. The processor comes integrated with Radeon RX Vega 11 Graphics, ensuring seamless graphics performance without requiring a dedicated GPU. It runs on the MSI A520M-A Pro AM4 AMD Micro-ATX Motherboard, supporting Ryzen 5000/5000G/3rd/2nd/1st Gen CPUs for future upgrade flexibility. The system features 8GB of Corsair Vengeance LPX 8GB

3200MHz DDR4 Desktop RAM running at 3200MHz with a 1.35V working voltage, providing fast and stable multitasking capabilities. For storage, it comes with a Colorful CN600 PRO 256GB M.2 NVMe SSD, offering 3200MB/s read and 1200MB/s write speeds with 3D NAND technology for durability and reliability. The motherboard supports up to 64GB DDR4 RAM, features 1x M.2 slot, HDMI 2.0, VGA output, and RTL8111H Gigabit LAN for high-speed connectivity. Housed in a tempered glass and steel case, it comes with 4 pre-installed cooling fans, 4 PCI slots, and a 200W pre-installed power supply for efficient cooling and power delivery. This gaming PC combines speed, durability, and upgrade potential, making it ideal for gamers and content creators looking for a cost-effective, high-performance system.
